(b) The decline in production of phosphatic fertilisers, may be attributed fo decline in demand as a result of sharp increase in its price since the decontrol in August, 1992 and higher cost of indigenous production. The passenger car industry has benefitted from the reduction in customs and excise duties and cheaper availability of credit.

(c) The food products industry has shown a decline ofl5.1 % during April—October, 1993-94. The production of cloth and yarn has registered an increase of 2.2.% and 11.4% respectively during April—September, 1993-94 compared to the same period last year.

(d) The decline in food products industry is mainly due to a sharp fall of 59.3% in production of sugar during April—September, 1993 over the same period previous year. This may be attributed to drought conditions in certain States
